NOTICE ON IMPLEMENTATION OF ISPM NO. 15 FOR IMPORTS

The Department of Agriculture (DOA) Malaysia will be implementing ISPM no. 15 for imports starting 1st January 2010. As such, all wood packaging material (WPM) used in any consignments imported into Malaysia should be treated and marked accordingly as prescribed in the regulation. A grace period of six months from the date of implementation will be given to allow all government agencies, forwarding agents and the importers to familiarize with the necessary requirements.

2. Effective 1st July 2010, the following Phytosanitary Measures shall be enforced in the event if the following situations occur:

WPM with Approved Marking but live regulated pest found

a) Commodity shall be subjected to treatment at once, if it is not possible, the commodity will be returned to sender/country of origin or destruction of the WPM, all of which is at the exporter's/importer's expense

WPM without Approved Marking, with or without live regulated pest found

a) Commodity shall be subjected to immediate treatment at the exporter's/importer's expense.

b) If WPM condition is bad, the WPM will immediately be destroyed at the exporter's/importer's expense or may refused entry.

3. As most countries are now implementing ISPM no. 15, DOA would like to advice that all WPM used in exporting consignments should be treated and marked as required by ISPM no.15.

The official revised 2009 ISPM 15 document is downloadable at <http://www.ippc.int/IPPC/En/ispm.jsp> and can be used as reference.

Thank you

Director General of Agriculture Malaysia

Dear Sir,

PROCEDURES ON IMPLEMENTATION OF ISPM NO. 15 FOR IMPORTS

Notice on Implementation of ISPM No. 15 for Imports dated 14 September 2009 is referred. The Department of Agriculture will be implementing ISPM No. 15 for imports starting 1st January 2010.

2. For implementation of the ISPM No. 15, the importer must comply with procedures as stated below. For WPM from Sabah and Sarawak the same procedures apply.

Thank you

Director General of Agriculture Malaysia

PROCEDURES TO IMPORTS WOOD PACKAGING MATERIALS (WPM)

AGRICULTURAL COMMODITIES

1. All exporters should declare, %dthis consignment contain wood packaging materials+, by stamping on the manifest/ invoice/ packing list
2. All importers should apply for inspection / clearance to Customs/Port Authority at least 24 hours prior to arrival of cargo for all commodities accompanied with WPM.
3. Upon arrival, WPM shall be subjected to inspection and clearance by MAQIS Officers or Import Officers*.
4. All trans-shipment may be inspected / cleared at the final port of destination.
5. All WPM should have the required / approved marking. *There is no requirement for a date to be a part of the approved marking per ISPM 15.* No other documentation is required for the release of WPM.
6. The following phytosanitary measures should be followed in the event of the following situations ;

*

I. Without Approved Marking

- Commodity must be put on hold and shall be under guard by MAQIS Officers or Import Officers*.
- If the commodity with the WPM will not be affected by Methyl Bromide treatment, conduct treatment at once.
- If Methyl Bromide has an effect on the commodity, necessary stripping of the commodity will be required.
- Non . compliance report shall be prepared by MAQIS to be submitted to DOA for notification immediately to the NPPO of the country of origin and a copy furnished to the importer.
- Any non-compliant WPM must at all times be stored in a closed container that is effective in ensuring that pests are not allowed to enter the environment.
- Storage areas of non-compliant WPM must be :
 - i. isolated from other domestic wood commodities;
 - ii. materials that has already undergone processing and
 - iii. adjacent forested lands by no less than 30 meters.

* Define as in Plant Quarantine 1981

-
- If the non-compliant WPM need to be disposed off by burying, :
 - i. It should be buried at a minimum depth of 3 meters below the surface of the ground, at a site where re-excavation of the material will not occur and
 - ii. wood must not be left exposed within the burial pit.

 - If WPM condition is bad (eg.: heavily infested, rotten wood), the WPM will be destroyed or refused entry.

II. With live regulated pest found

- Commodity shall be subjected to treatment at once if possible. If not, it should be returned to sender/country of origin or destruction of the WPM at the exporter's / importer's expense.

- Non-compliance report shall be prepared by MAQIS to be submitted immediately to DOA for notification to the country of origin and a copy furnished to the importer.

NON – AGRICULTURAL COMMODITIES

1. All exporters should declare, %this consignment contain wood packaging materials+, by stamping on the manifest/ invoice/ packing list
2. All importers should apply for inspection / clearance to Customs/Port Authority at least 24 hours prior to arrival of cargo for all commodities accompanied with WPM.
3. Upon arrival, WPM shall be subjected to inspection and clearance by MAQIS Officers or Import Officers*.
4. All trans-shipment may be inspected / cleared at the final port of destination.
5. All WPM should have the required / approved marking. No other documentation is required for the release of WPM.
6. The following phytosanitary measures should be followed in the event of the following situations ;

I. Without Approved Marking

- Commodity must be put on hold and shall be under guard by MAQIS Officers or Import Officers*.
- If the commodity with the WPM will not be affected by Methyl Bromide treatment, conduct treatment at once.
- If Methyl Bromide has effect on the commodity, necessary stripping of the commodity will be required.
- Any non-compliant WPM must at all times be stored in a closed container that is effective in ensuring that pests are not allowed to enter the environment.
- Storage areas of non-compliant WPM must be :
 - i. isolated from other domestic wood commodities;
 - ii. materials that has already undergone processing and
 - iii. adjacent forested lands by no less than 30 meters.
- If the non-compliant WPM need to be disposed off by burying, :
 - i. It should be buried at a minimum depth of 3 meters below the surface of the ground, at a site where re-excavation of the material will not occur and
 - ii. Wood must not be left exposed within the burial pit.
- If WPM condition is bad (eg.: heavily infested by pest, rotten wood), the WPM will be destroyed or refused entry.

II. With live regulated pest found

- Commodity shall be subjected to treatment at once if possible. If not, it should be returned to sender/country of origin or destruction of the WPM at the exporter's / importer's expense.
- Non-compliance report shall be prepared by MAQIS to be submitted immediately to DOA for notification to the country of origin and a copy furnished to the importer.
